Each year more and more people are giving living growing plants as gifts for all occasions.

A Gift that won't wear out.

A Gift that will not be used up.

But a gift that will become more beautiful and more valuable year after year.

What finer gift than a living, growing plant

For Birthdays—For Christmas,

For Mother's Day—For Anniversaries,

For Weddings—For any occasion.

Year after year this gift will be a reminder of your thoughtfulness.

Silver Bay Nurseries make a specialty of selecting and sending fine plants for gifts with special card and wrapping. Write us your requirements.

Conditions of Sales and terms.

Cash with order.

Guaranty—All stock sold subject to crop losses or through unavoidable causes. We are careful to keep our varieties true to name and will replace on proper proof any stocks that may prove otherwise. No claims will be considered unless made within ten days after receipt of goods.

Shipping—We request customers to give definite shipping instructions. All shipments to travel at the risk and expense of the customer. All evergreen plants are balled and burlapped unless otherwise specified. Please add 10% packing charge for such stock. We do not charge for packing on smaller plants and deciduous shrubs or trees.

# SILVER BAY NURSERIES

On Mobile Bay

DAPHNE, ALABAMA

An open letter to those who love—grow  
and collect Camellias.

Dear Friends:

Herewith is a well balanced variety list of the finest Camellias grown—also list of Azaleas—and miscellaneous stock.

Silver Bay Nurseries stock is all grown in the open—some in the semi-shade of trees—some in the full sun, just under such conditions as the plants would have in your own yards. We use no chemical fertilizers. The plants are not forced in any way. All plants are given plenty of room for proper root and top development. All stock has been sprayed, and of course, inspected, and certified to be free from disease.

The plants listed are hardy and healthy and should go right on growing in your yards, with the minimum of attention.

Good Camellias are scarce. We have some of the varieties listed in very limited numbers. We advise you to place your order now, to get your choice of varieties.

All evergreen plants, even smaller sizes, are balled and burlapped unless otherwise specified.

It will be a privilege to serve you and if we are favored with your order it will have our special, personal attention.

Thanking you,

Silver Bay Nurseries,

Daphne, Alabama.

## CULTURAL NOTES ON AZALEAS, CAMELLIAS AND OTHER SHRUBS AND TREES

The planting and care of all plants listed—for practical purposes—is identical.

Any good garden soil, slightly acid, with plenty of rotted leaves and leaf mold from hardwood trees, such as oak, bays, gums, etc., worked in—is satisfactory. The soil must be well drained. Azaleas or Camellias, in fact, very few plants will tolerate standing water or water saturated soil.

The actual planting is important. Never plant any deeper than previous planting—even an inch or two too deep—will produce a sickly plant. It is advisable to plant Azaleas and Camellias slightly higher than previous planting, bringing the surrounding soil up to the balls. This allows for gradual sinking in soft soil.

**Fertilizing**—Silver Bay Nurseries do not recommend heavy fertilizing. If plenty of leaf mold is used in the soil and as a mulch—very little extra fertilizer is needed. Cottonseed meal, tung nut meal, or well rotted barnyard material are excellent and organic fertilizers. Too much fertilizer produces too much top growth and such plants do not bud or bloom well. Also too much fertilizer can easily injure tender root systems.

Two applications of fertilizers a year is generally practiced—the first soon after blooming, in early spring—the second from middle to last of June.

**Spraying**—Volck used at the rate of one part to 50 parts of water, adding one to two taespoons of Black Leaf 40 to every gallon of water, is effective against all scale and most insect pests. Spray should never be used in late Fall as a freeze causes great damage if it hits soon after spraying.

**Watering**—Both Camellias and Azaleas love a humid atmosphere. Use plenty of water, especially during the hot dry spells. Keep all newly transplanted stock well watered. Soak thoroughly when planting, and do not allow to dry out.

**Mulching**—A good mulch—three to four inches—of leaves or pine straw is beneficial. In the winter bring mulch well up on and between the stems of the plant; damage from freeze often occurs at the base of a plant.

## RARE CAMELLIA GRAFTS

Many varieties of the rare Camellias are slow, delicate growers on their own roots. By grafting these varieties to the root of a hardy, fast-growing variety of Camellia, we procure a fine heavy, good growing rare Camellia—the blooms of a graft are often finer and larger than those of the same variety on its own root. The grafts generally bud and bloom the second year—a few varieties seldom bud until the third year. We highly recommend our two and three-year-old grafts. Most of them are nicely budded—many of them budded at almost every terminal. No waiting—a year or two

for these plants to bloom—but you will enjoy the full beauty of these plants this year. All are strong, sturdy grafts in fine condition. We find that purchasers coming into the nursery buy more of these budded and blooming grafts than the one-year grafts. When seeing and comparing the plants, the buyer feels he makes a better purchase in the two or three-year-old graft.

However, our one-year grafts are splendid plants and we feel sure will give entire satisfaction.

Nearly always a graft will bloom true in color and form—but rarely—due to some influence by the understock—a solid color will bloom variegated. In all cases the variegated form has proven more beautiful than the solid color. Therefore, we guarantee the scion to be true as to variety—but if it blooms true or not is sometimes beyond our control.

## CAMELLIA SUSANQUA

These handsome flowering plants, one of the finest of the evergreens, are just now becoming popular and well known. Same family as Camellia Japonica, but much faster growing and much hardier. Can be grown much farther north without protection than the Camellia Japonica. They are profuse bloomers, coming into bloom later part of September, continuing on through the fall into early winter, blooming at a time when very few flowers are in bloom. Flowers are in several colors, about the size of the Camellia Japonica, ranging from single to semi-double and full double. They make a real showing as specimen plants in foundation plantings or in shrubbery beds. We offer the following best varieties:

**Cleopatra**—Very compact grower, flower is semi-double to peony. Rose pink in color.

**Dawn**—Single to semi-double, ivory white with flesh pink at the margins of the petals, yellow stamens.

**Rosea Grandiflora**—One of largest flowers, light soft pink; very fast grower.

**Snow-on-the-Mountain (Mine-No-Yuki)** — Flower large, double, peony form, pure white.

## AZALEAS

### 50,000 AZALEAS IN STOCK

**INDICA AZALEAS**—The most popular group of all Azaleas. Fast growers with masses of large flowers. Evergreen and hardy in the Southern States. Silver Bay Nurseries specialize in Azaleas for landscaping uses. All Silver Bay Nurseries Azaleas, even the smallest sizes, are grown in the open—in just ordinary soil conditions. They are not forced in anyway. This insures the purchasers a healthy, hardened plant that should go right on growing with the minimum of attention.

We have many fine specimen plants in most of the varieties. Ranging in price up to \$25.00. If interested in these larger sizes, write for detailed description.

We offer the following varieties in the following sizes and price groups:

**Brilliant**—Good grower, small, dark green leaves; deep watermelon color.

**Dorking**—Deepest red of the Indicas; small, shiny leaves; late bloomer.

**Duc-D-Rohan**—Compact grower; small leaves, delicate salmon pink flowers.

**Daphne Red**—Graceful arching branches, profuse bloomer; soft shade of red.

**Elegans (Early Pink)**—Fast upright grower, light pink flowers. Early bloomer.

**Fielder's White**—Large, pure white flowers, fine foliage. Early bloomer.

**Formosa**—Fast upright grower, large dark green leaves. Large, light lavender flowers.

**George Taber**—Lovely, soft lavender pink, darker variegation; light green leaves. A beautiful and rare Azalea.

**Gulf Pride**—A beautiful new Azalea; very delicate, light lavender flowers; large, light green leaves.

**Indica Alba**—Pure white flowers. Very hardy.

**Lawsal**—Light salmon pink flowers, very hardy; a beautiful plant and profuse bloomer.

**Martha Louise**—A fine new Azalea. Large, orange pink, waxy flowers; thick, shiny dark green leaves. Late bloomer.

**Phoenicia**—Fast bushy grower. One of the hardiest of all Indicas; large lavender flowers.

**President Clay**—Good upright grower; orange-red flowers.

**Pride of Mobile**—Most popular of all Azaleas. Fast grower, hardy, light green leaves; brilliant watermelon pink. Profuse bloomer.

### **KURUME AZALEAS**

**often called Dwarf Azaleas**

The popularity of these beautiful profuse blooming plants is increasing rapidly as they become better known. Used singly or in groups with other plants or as borders, etc., they give most pleasing landscaping effects. They offer a wider range of color than any other variety of Azaleas. They are surprisingly hardy—will grow farther north than the Indicas. Also are becoming popular as pot plants. We offer the following Kurume varieties at the following prices:

Heavily budded, 8 in.-12 in., \$1.25 each; 10—\$11.00.

Smaller size plants, but bushy and hardy; will bloom this year. 4 in.-6 in. spread.

**Mizu-No-Yamabuki**—Small, creamy-white flower; only variety of several hundred evergreen Azaleas producing a yellowish flower.

**Yakumo**—Maroon red, hose-in-hose, roundish petals.

## MACRANTHA HYBRID AZALEAS

We offer this year a limited number of these beautiful Azaleas. This group blooms later than the Indica, usually from April to June. The flowers are very large, some hose-in-hose, some full double. They offer a wide range of color. The plants grow very compact and bushy, with small glossy, dark green leaves. They mature into a very bushy plant, in height between Indicas and Kurumes. The Macrantha are considered much hardier than the Indicas and will do well farther North. Everyone loving plants and flowers should add these Macranthas to their plantings.

We offer the following lovely varieties in these sizes and prices:

8 in.-12 in. spread, \$1.25 each; 10 for.....\$11.00

4 in.-6 in. spread, 60 cents each; 10 for..... 5.00
